## EN INSTRUCTIONS

Thank you for purchasing this Olympus product.

To ensure your safety, please read this instruction manual before use, and keep it handy for future reference.

Turn off the camera before attaching or removing the lens

① The lens extends automatically.

- Camera off (①)
- Camera on (②)

② Rotate the zoom ring (A) in direction ① to zoom in or in direction ② to zoom out. Select from two speeds: zoom speed is determined by the angle of rotation.

The lens can be used with an optional LC-37C auto lens cap. The lens cap can not be used when a filter is attached.

**Note:** Do not attempt to forcibly prevent the lens from extending or retracting or otherwise apply excessive force to the lens while moving parts are in operation.

### Notes on Shooting

- Edges of pictures may be cut off if more than one filter is used or if a thick filter is used.

4 EN

- The lens may cast shadows in pictures taken with a flash.

### Main Specifications

Mount	: Micro Four Thirds mount
Focal distance	: 14 – 42 mm (0.6 – 1.7 in.) (equivalent to 28 to 84 mm on a 35 mm camera)
